1) Discarded Suicide,...We all are Hopelessly Doomed...to Optimism.

2) I'm Speaking in my Own Name, but in reality I mean a Good Part of Humanity that, at least, Intuit in the Same Way.

3) That's how Intelligent People Work,...Jokes are Intelligent, even Bad Words are Intelligent,...and that's why I had to Invent all kind of Completely Absurd Things...To Seem Intelligent.

4) I've Invented Myself for My Own use, what I call...The Resource of the Exaggerated, not only to Convey Facts, but also Ideas and Feelings at the same time.
For Example: I could say that the Most Important Thing to make Sex is Hygiene,...right?; then employing this Resource, I would say..."I've Never Bathed so many times a day in My life", but then I Clarify,..."No, It's not like that, I'm Exaggerating, but,...That's the Idea", LOL.

5) Take Many Pictures during all Your Life, Very Many Indeed, because Memory (like RAM) is Volatile.

6) The Universe exists because We can Perceive It, if One Dies the Universe Disappears. So Try Not to Die!, LOL.

7) When I was Little I thought that Everything that Work, Work by Art of Magic, I Believed in Magic!,...To realize otherwise was the Biggest Disappointment of My Whole Life. But this brought new Possibilities, and that's that You have To Make Things Happen, There's No One Else!

8) I have Never had a Spiritual Connection with any kind of God. As I always say..."Let Everyone do what They Feel to make their Lives what They want."
I can't go against my Feelings,...Right?
Of course People also have, among others, Spiritual Needs; and It's fine that It's so. Well,...It seems that I don't have them,...because I'm very at Peace with Myself.

9) Everything I've mentioned Work for Me. Now what You have to do is to Find Something that Works for You. We all have the same Values, but Deep Down We all are Very Different, with different Yearnings, Needs, Desires, and Hopes.

10) For me Everything has to be absolutely Planned in Life, and work with the precision of a Swiss Watch. I don't like Surprises.
As Colonel Hannibal Smith of the TV series and the Film The A-Team said..."I love It when a Plan Comes Together."
I'm Not an Impromptu Person, and that's solely because I have No Improvisation Capacity. Does that makes me a Non-Authentic Person?,...I don't know!... I would say that I am Authentic,..."♪ I did It Myyyy Wayyyy ♪."

11) My two Brothers, younger than me, are already Bold, and that's why I Dye Myself, because I'm the only One who can have Grey Hair, LOL.

12) Like the TV Soaps...Uncontrolled Passions!; or...the eternal Sufferers, What a way to Suffer please! Losing Control, No..., Never Ever! I would say that I can be Intense some times; Let me be Intense in my Intimacy, Please Permit It to me!

13) Many Times, the Most Convenient is...-To Shut Up- "I don't Need to Insult Anybody to Satisfy my Ego."

14) I'm Not a Person who has all the answers, I don't know them all,...I keep learning. I'm an Eternal Student.
I hope I'm not Too Redundant for the Obvious (In all my Parables).

15) How would I like to be Remembered?...Well, looking at my Life in retrospect I see that's full of hits, everything that I've proposed I've achieved, of course I've proposed Possible Things and based on my Own Effort.
So I want this Written on my Tombstone: -Oscar Garcia was a Man, whose FINITE Life, was a SPECTACULAR SUCCESS-
-Oscar Garcia was a Man who Knew how to be HAPPY-

16) It's a Great Thing that I've Pensioned at an Early Age (This is far from having Economic Independence). I give a lot of value to Leisure Time for Creativity. Many will say that I have Too Much Free Time.

17) I have a medium height, so I'm neither too tall nor too short. That's why I could tell a Tall Person..."No, don't be confused,...You are the Tall One, I'm the Normal One", LOL.

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

18) They asked me if I can read the minds of Others, "But noooo!, I have a Very Developed sense of Intuition, that's all." It's just Common Sense, the so-called... The Least Common of the Senses. I'm a Great Character Identifier. -The fact that I can Understand someone Perfectly Well, Doesn't Mean that I Agree with them-

19) Before, I was too taxative, It was Yes or No, White or Black, there were no shades of intermediate grays. Now I say..."Where is the Problem?,...Which One is the Problem?,...There really is No Problem,...It's Oneself who does the Problem!" But not for that reason to take the risk of being Too Permissive.

20) Before, I absorbed all the knowledge like a sponge; all the Good, but also all the Bad. Now the only thing I want is to see the Beauty in Life. I want to go to the Cinema and just watch a Movie with Happy Ending. It's the Only Thing I Want.

21) This is a Hobby for me, there are People who Collect Stamps, I don't know anything about Philately; but well,...I Do This. Not only does It keeps me Busy, but I also have a Lot of Fun.

22) I'm Exaggerating, but this is the idea I want to Transmit: One, the only thing that want in Life is to become a Luminous Being, a Curative Being, Healer to Family and Friends. Instead there are People that everything They touch turns into a Formless Mass of pus and fecal matter. How's that Possible?
Obviously these Persons find an excuse to go against their Best Criterion, their inner voice that tells them..."Don't get in Trouble."
Or,...Do You believe that Good Parents and Good Husbands come from there?
-What to do with them?,...Well, let's see: They Learned all the Bad, I see that is Perfect!,...Now all They have to do is Learn all the Good to be Complete Persons, Integral Human Beings-

23) I haven't had the opportunity to learn to play a Musical Instrument, but, my Artistic Part is that I'm a Great Movie Fan (You can say that I was born in the Cinema,...at that time my Father was a Projectionist of the Lux Cinema of the City of San Lorenzo, located 20 Miles north of the City of Rosario, and I was there all the time since I was a Baby). Is for that, that another of my Hobbies is to Edit Movies. I like very much to operate the Video Editor, and choosing the exact point where to begin and to finish a Sequence, given by the Image, the Dialog, or the Music. And in this way, to well-known Movies, I give them the Direction and the End I want.

24) In the Congress of the Spanish Language, realized in Rosario some years ago, Roberto Fontanarrosa (Graphic Humorist and Rosarino Writer, RIP), Defended the use of Bad Words, saying that..."its employment in the Language is Irreplaceable." I, on the other hand, say that..."The Spanish Language is Rich enough as for explain Everything Perfectly Well without need to resort to the use of Profanities."
I mean that I would teach my children the Right Words, especially as regard Sex.
-If You use the Right Words You will never have the Doubt of being Wrong-
It's that!; Or It's,...As Bruce Willis in the Movie The Fifth Element (1997) said...
"I only speak two Languages: English and Bad English."

25) The difference is always made between People who are Specialists (They know a lot about one or two things) and the Generalists (Who know a little about many things). I instead say that,..."Notwithstanding being a Specialist in some Discipline, It's Very Convenient to know a little bit of Everything."
I talk about the Convenience that would result from getting Us out of trouble at some time.

26) I generally follow the Great Migratory Movements of Thought. If I see Many People running to one side, or on the contrary, if I see Many People running in the opposite direction, I ask myself..."What do They know that I don't know?"

27) It is said that We all have our Successes and Mistakes, our Greatnesses and Miseries. I say..."People who Work, Study, Raise a Family; in this way passing Everyday Life, the day by day, the year by year, trying to Overcome themselves, trying to Improve as Persons,...They will never can have Miseries!...the only thing They can have are Greatnesses."

28) As fewer and fewer People believe in the existence of a God, then...What Moral Values Guide Us? Well, Millennia ago all Knowledge and Wisdom were only reserved for Kings and Pharaohs; and the People, as I say..."We were all Little Animals." What has been achieved over this Centuries is that this knowledge will be turned to Us, and perhaps part of that Wisdom; and today We have been Granted that the Supervision of our Actions is placed on...
our own Conscience.
-Even Children know the difference between Good and Evil-

Rosario, Argentina: 08/13/2021

29) I've never been happy with my Names, because I feel They don't Represent me. And when I was a boy, I told my Parents,..."What lack of Imagination to choose the Name of a Baby!", to which They replied..."there were nothing else, It was what was used in that time." This is even worse, It makes me feel Too Old. As for example the Names of some of our Heroes, They already harmed the kids from the beginning!; but for God's sake,...How do They Parents even Consider those Names?

30) When I was a kid, I asked my Nona (Grandmother, in Italian)..."Nona...Is It true that Old Times were always Better?", and the Old Woman, with her typical rotten character, answered me..."Noooo,...they were better What!, -One worked all day long for Nothing-; Cooking all morning, and Washing clothes all afternoon. We didn't have all the technological advances that We enjoy today, such as having a refrigerator, the bottles were lowered into the waterhole because It was cooler down there. People Died and It wasn't known what They Died of."
As I always say..."We are definitely Much Better Now than We were 2,000 years ago,...In Every Way!"

31) What's the Problem with all Fanatics throughout History?: Everyone has a Superior Ideal that Guides them; There's no Problem so far. But,..."The Methods They use to reach that Superior Goal are...Abominable." We Live in Society, there are Laws and Inalienable Rights of the Human Being. There's no wait for millions of People to be killed,..."Someone Must already Act when only One Person has their Rights Violated."
For Example: This manifests Itself very well in the Movie Avengers: Infinity War (2018). Thanos, is an Extraterrestrial Being, who has had a Brilliant Idea, and is to End Overpopulation in the Galaxy, and therefore, also Pollution...Look what an Uprightness!, This really is a Higher Order Thought inspired directly by the Gods; but..., the Method that Thanos utilizes to reach this Superior Ideal is...
-To Eliminate half of the entire Population of the Galaxy-, LOL...Ah yes?...
I don't think so!

32) If You have to choose a Song, what Song would You choose? Well,...It's still in force Imagine (1971) by John Lennon (The Brotherhood of Man).
Just after War World II there is a New Social Thought. It's that the World is made for all the People of Good Will, We all are People of Good,...Right?, and with the same Values.

So, to solve Conflicts, We don't have the same Archaic Mentality of decades ago, that the Winner wins Everything, the Loser loses Everything, and to send millions of soldiers to certain death. Everything that was done was based on blood and fire. Today that's considered to be Bully, Barbarian, Immature, and Irresponsible (They are not Responsible for their Actions); People as Limited as these cannot be in charge of a Country,...Not of a Modern, Civilized, and Responsible Society. Today We all have Too Much To Lose.
Considering all this, in the Modern Mentality what is seek is to Reach an Agreement, a Compromise in which We All Win.
-Knowing how to Negotiate is an Art-

33) The subject of the Signs of the Zodiac. I don't believe a single word in them, especially since It doesn't apply to me. Looking at the Big Picture We all have, more or less, the Same Qualities (We better be).
But,...What the hell!...I find It funny,...Why not?;...one more topic of Conversation,...Right?

34) I think that all Women are Girls Deep Down, and We all Men are Boys In the Surface.

35) All Successful People in the World pay a lot of Attention to Details, They leave Nothing to Chance; They Practice more and more, and with Practice They achieve Perfection in Everything that's done.

36) I was telling a Relative..."Please don't tell me that I'm a True Puritan", She tells me..."Noooo, You definitely are not!", and I said..."Well, luckily, What a Relief !, I was already Worrying, I'm Normal!"
Very Few People in the World have been Saints. The rest of all of Us are located right in the Middle between Heaven and Hell, between Good and Evil. One cannot look at one End without contemplating the other. Something is often said that...
-The Midpoint is the Right One for Everything in Life-

37) I've been told that I have a Lot of Imagination. I say that..."It's Not by Choice." In an increasingly Complex World, One is forced to resort to all the Resources available to Us: Imagination, Brightness, Cunning, Picardy, Courage...

38) What are Politicians?!...I saw this Television Sketch in California in the

2000s. A Candidate for a Political Position is invited to a TV Show to introduce his Political Platform...He began to speak very strangely about Controlling People, moreover, at some point He said..."Slavery is a very ugly word, but..." (He tried to justify It). Then He was so objurgated by the Program's Presenter that the Candidate finally broke down, and between sobs, He said..."I do care about People, of course I care about People!, What happened is that I was Starving, all I wanted was a Permanent Job, and the only One that Contributed with 2 cents to my Campaign was the Nazi Party...", LOL.
Do You realize?...-This guy more Miserable can't be!-

39) Now that We are the Creators and We have Settle Down, Will We be?...
-The Ancients- (In the Galaxy). Venerable and Wise Elders worthy of Admiration, Respect, and why not Reverence.
Someone asks..."Who are You?", and We answer..."We are...
The Ancients...!", and the first One says..."Come In please, come, come...", with a Reverence.
First Contact with Extraterrestrial Beings, and We say..."We are...
The Ancients...in the Galaxy."
-We have to see Who We are them for, and Who We aren't, Of course!-, LOL.

40) The Classic Film par excellence, of course...Casablanca (1942). Secondly I would place...The Good, the Bad and the Ugly (1966). This is because of its accuracy to Historical Details; It's seen very well as Dirty, Bearded, and Dusty Cowboys are eating a stew on a vessel of cooked clay, with a wooden spoon; and They aren't drinking Whiskey or Beer, but an Ordinary Grappa. This is one of the Spaghetti Western (American Far West Movies made by Italians). Sure, this is understood thanks to the Masterful Direction by Sergio Leone, and a Powerful Soundtrack of Original Music by Ennio Morricone.

41) Does Destiny exists?,...the answer is...in first instance...It Does Exists!, and I'll explain to You why: Everything that moves does so in a Very Predictable way, everything is explain perfectly well by its Rules and their Mathematical Equations. The Sun rises in the east, and It Doesn't do just anything in the sky before setting in the west, on the contrary, there are the Rules of Celestial Mechanics, so its Orbit can be Predicted very accurately for the next thousand years, and each Eclipse can be specified well before its occurrence. Well, so in this way with every Particle of Matter and Energy that exists in the Universe, and of course, also with all the

Particles that make up our Bodies.
But,...there are so many Particles, the variables involved are so extremely Numerous that It doesn't exists, and there is probably never a Computer in the World that can calculate all its interactions at any given time.
So, for all Practical Purposes,...No...There is no Destiny!
As Dr. Brown told Marty and his Girlfriend, in the Movie Back to the Future III (1990)...“The Future hasn't been Written yet, It's whatever You make of It, so try to make a good One for both of You.” Which means that there are many, but many things We can do to Bend that uncertain Future in our favor. And that is what We all do,...We draw a Life Plan from our own actions; of course, always betting on Life, not Death. It's that!; Or It's,...As the Saying goes,...“If You're sick and You're going to Live,...What do You worry about!; and if You're sick and You're going to Die, also,...What do You worry about!”
One is the Owner of our Own Destiny. Do You Accept this Responsibility that You have with Yourself ?,...Or Not!..., -Many People Do Not Accept to be the Responsible for their Own Destiny-

42) La Belle Noiseuse (1991): (French, 4 hours long) It's another One of my Favorite Movies. I think It really helps to Raise Aesthetics in the World.
The Actress Emmanuelle Béart spends three quarters of the Movie Nude Posing, in very different positions, for a Picture Painter.
I've Edited this Movie: I've Downloaded It with a very Good Resolution, I've Isolated all those Scenes, I've put It Subtitles, and below the Voices of the Dialog I've put It the Musical Soundtrack of the Movie Emmanuelle (1974); in a half-hour Video Clip.
I Wonder...“What did the Actress Do to have such an Even Skin Color all over her Body?”

43) Half of Humanity says that the Internet should be Free, the other half says They should Profit from It. I say...“Both Opinions Complement each other very well and form a Wise Balance.” That those who download programs Professionally for Commercial Purposes Pay for It, leave me with the Free Ones for Personal use in my Home.
That's why I don't worry at all about a Hacker Intrusion, my Credit Card Number isn't written anywhere in my Computer, I have Never Paid for anything; moreover, if someone wastes their time and money to investigate me, in fact...They're making me a Compliment!

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

-My Confidential Files are located on a Pen-Drive, and I Disconnect the Wifi from the Computer when I work with them-

44) The Great and Famous Argentine Film Directors of the Golden Age of Cinema were the Pioneers, yes, but I don't consider them to be the Best.
On the Big Screen: Some Lovers are Professing their Love; She turns facing the camera, but with her back towards Him, and looking up, She says..."Yes, I love You too..." It's fine that there were Technical Limitations, but I say..."There was no Producer, Writer, Cameraman, Sound Engineer,...Assistant, to tell the Director that this scene is Terrible."
I think It's much worse than that,...the Directors themselves surely realized that, of course, but They went to Safety, to what was already Known, They didn't Innovate, They didn't Shake the waters, It was just because They had a job and not starve; Of course, all of these are much worse than Ignoring It.
What are You going to tell me? That was what was used, that there was nothing else, that They had to solve problems as They could with what They had at hand. No, boys or girls, an Artist has to be a Creative, can't have Limits,...-Every Artist should be a Revolutionary in Art!- Obviously those Directors..."They were not Steven Spielberg, Right?,...No, They were not!; Well,...There is the Answer."
As I always say about so many Singers and Musical Groups..."They are not Michael Jackson nor Queen, Right?,...No, They are not!; Well,...There is the Answer."
Of course,...I place myself in a very Convenient Position,...Of Critic only, LOL.

45) In the Movie Lucy (2014) It is perfectly established what the Purpose of All kind of Life is. What has Life always done since its origin as Bacteria until today with Us?, and is..."Pass the Information Learned to the next Generation!" And the Movie ends with the voice of Scarlett Johansson that says..."Life was given to Us a Billion years ago, now You already know what to do with Yours."
I like this Concept, but,...I have a sommmmewhat Different Idea.
For that I had to do an exercise of Imagination to glimpse what our forefathers did to survive. And I think...I'm clearly Citadine (From the City). Centuries ago, What were my Ancestors doing? Surely They were Rural Workers who had their Crops and Farm Animals. If We look much further back, in its origins, They were probably Hunters/Fishermen/Gatherers/Nomads. Yes but,...How did They managed to survive to these days?, given that, surely on many occasions They have been Tested in very different Extreme Situations, such as Wars..., and I said...

"Of course,...They didn't commit any stupidity like, for example,...letting themselves be killed!" Then It occurred to me...Why did their Dynasty survive?, Why did their Lineage survive?...Because our Ancestors were anything,...but... Stupid!...
Then,...Correcting Scarlet Johansson's words, I would say..."Now You already know what to do with your Life,...Be Anything,...But...Stupid!", LOL.

46) Love, As I always say..."Aaaa,...The Last Mystery of Life!",...Yes of Course, I Really Felt It at 17 years old...So I had a Girlfriend!...I knew It,...but She didn't. (Still, for me, Love remains a Mystery).

47) Mission Impossible: There were 5 Agents, and each of them did their part with absolute Precision, to make a Mission be Possible.
James Bond 007: The Spy with License to Kill (Whoever He Wants,...However He Wants, and...Wherever He Wants), (They Gave Themselves the License, Nobody Else Did, LOL). Always Ready to Save the World. It had 3 Virtues: Of Course, absolutely Everything James Bond Did was with the Law of Least Effort,... Everything. Those little electronic Gadgets that helped him, for example, to open a safe. And, the always Impeccable Presence of, for example, Roger Moore, as a true English Young Gentleman.
Star Trek: With its Multi-ethnic Cast. It represented the Humanity United in the pursuit of a Common Higher Purpose. That's Star Trek! So what a disappointment when in one of the Sequels of the Movie, Mr. Zulu (of Japanese origin), says... "Oh, San Francisco, that's where I was born",...Whaaaat?,...But why They don't go to Hell!
-All of the above has been Distorted; What gave them a Name; What gave them Representativeness in the World; all that has been Forgotten. Now They are just one More Action Movie, one more inside the Heap-

48) I always use to Self-Refer the Actor Tom Cruise, because We are Physically Identical (not the face). He makes almost all his Risky Scenes in his Movies.
So if He Parachutes, Why don't I? As I always say..."everything that is Skydiving is Summed Up in...The Confidence that One has for the Person who Folds the Parachute",...That's why I've never done It!
This is the same as flying on the Space Shuttle, What can I worry about if there are thousands of Scientists who are doing Everything Possible to make the Mission a Success? Yes, but, It has already been seen, sometimes, that doing Everything

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

Possible was not enough. And those who do It are Heroes,...Right?; Well,...I don't Think the same way!

49) We must be prepared to accept the Challenges of the 21st Century; That's why I always tell Young People..."If You made an effort to finish High School, make a little more effort to go to College." As Dr. Adrián Paenza (University of Buenos Aires. Leelavati Prize -2014- for the Best Divulger of Mathematics in the World) says..."One Studies, in first instance, to be a Better Person"; I would Add..."If, with the Study, You can access a Better Job, and a Higher Standard of Living,... Welcome, It'll not be Despised, of course."
It's precisely in the University where the -Connections- are made. Everything We've learned in a completely off-hook manner in Primary and Secondary Schools, One finds its Cause and Effect; and One says..."So This was caused by This Other Thing?...Ah...Now I Finally Understand It!"
When I Studied, Most of Us were all Young, but some Older People also attended; some were Entrepreneurs who wanted to gain a Deeper Knowledge of the Scientific Management of a Company; but there was also a Man, already Retired, who wanted to obtain the Title of Accountant, and the only thing that Mattered to Him was that on his Tombstone says..."Here Lies the Doctor so-and-so."
Well,...He Earned It, nobody gifted the Title to him!
One of my Brothers Finished High School when He was already a Grandfather.
For the Beginnings of a Young Man or Woman, the University is a Great Opinion Maker. You can see this very well on the TV series The Paper Chase (1978-1986), with John Houseman playing as a Strict Professor at a Law School (Well known for its Excellence). When one Student raises his hand, stands up, and asks for a question; and the Professor says..."Well, Mr. Garcia, since You have interrupted this Class, please..."Stand Up Correctly, Stop Babble, and fill this Enclosure with your Intelligence!", (It's that!; Or It's,...As Homer Simpson would say..."No,... there is no Chance of that!"). Do You realize?...Persons Educated under these Principles, under these Values...Who can Tell them something?, the President of the Nation, the Pope himself; No..., They are who say How the World should Work!
Then,...To accept the Challenges of the 21st Century, You have To Study, Like It or not. As I always say..."For the Health of the Body, People must be Thin; and for the Health of the Mind, People must be Studied."
Another thing We can do is To Take On the role of Trades Apprentice.
Another One of my Brothers did not continue studying, but, as a Teenager He went

to a neighbor's Motorcycle Mechanic Workshop, then He Formally Perfected himself in this Trade, and thus became a practically Indispensable Operator for his current bosses.
-We have To Adapt to the way Man Evolved (Today Everything is Done by Pressing Buttons)- We are Obliged to have To Study, know Computing, know Languages, etc. There is No Option, because the Alternative is To Be a Social Outcast. And this is valid for Individuals, Cities, and Countries.

50) The other days I was looking at a Woman, She realized that, She comes to me and tells me..."Pig!" I say that..."It's Very Normal for a Single Man, Completely Free, to look at a Beautiful Woman", that's Very Normal; moreover, It wouldn't be Normal if that didn't happen!
-The first thing I would Teach my children is that We are Sexed Beings-

51) This is about, that in a Company, each Job Contributes to Maintain its Objectives. (This Fable is not known if It was True or Invented).
On the Eve of the First Moon Landing, President Nixon goes to the NASA Control Center; and He saw a feverish place, full of activities, with hundreds of Scientists working. He approaches One of them and asks..."What are You doing?", to which the Scientist answers..."I'm Trajectory, I set the Course where the Spacecraft has to go", and the President says..."Very Good, Very Good!"; He approaches Another and asks..."And what do You do?"..."I'm Life Support, I keep the Astronauts Alive providing Oxygen, Electricity, and Heating",..."Ah, Very Good, Very Well!";
He approaches Another and asks..."What do You do?",..."I'm Communications, I keep Communications Permanently Open so as not to lose Sight of them",... "Very Good, Very Good!"; and He approaches Another and asks the same question, and the Man answers..."I am the One who Sweeps here", and the President makes..."Uffffh,...!", to which the Man says..."No, Mr. President!, I, too, like Everyone else, am Helping to Put a Man on the Moon."

52) In a Material World like this One, purely Practical People are more Likely to Succeed; those who take things as They Come, without too much Questioning.
-We must be Able to Solve Problems, Not to Create Them-

53) My Recommendation for Young People. Keep in Mind that You're Learning, and You'll continue to do so for a Loooong Time. Don't do something that You can Regret Tomorrow, -If in Doubt,...There's no Doubt- (It means that if You have any

Doubt in Doing something, there's no Doubt that You do Not have to do It). Keep in mind that throughout your Life You'll Change your Opinions. Of course, I too, when I was young, was a complete Inexperienced in Everything. What have I been doing for the last 30 years?, Perfecting my Techniques in Everything! This gave me enough Confidence in Myself to continue facing Life, but this time, the Chances of Making Mistakes are Reduced. I used to do the Best I Could in Life, now I can Optimize It. Now I Try to do Everything what I do Very, but Very Well.

54) "♪ I am not a Physician, I am not a Physician; Nor I want to be It, Nor I want to be It ♪." To Live Permanently with the Suffering of Others,...No Thanks! I think that..."One Thing is to be the Surgeon in an Operating Room with the Optimal Aseptic Conditions, with the appropriate Light, the appropriate Instruments, and One doesn't even see Blood, because They have a Blood Vacuum; and Another Very Different Thing is that They bring You an Accidented Person on a Rainy Night with Shredded Clothes, Covered in Blood, Dismembered, with Fractures of Exposed Bones, Covered in Mud, and Screaming in Pain." For this You have to have an Absolute Certainty in Your Vocation!

55) I, Modestly, Consider that I have a Very Good Taste in all my Choices. Now,... talking in Good Taste, in general, means High Quality Items, and therefore, High Price. Well, the latter doesn't apply to me, which means I only have the Good Taste, and Nothing Else. I hate Gold, the Golden color doesn't match the color of my Eyes. I hate Gemstone Jewelry, since One cannot wear them Permanently. I do like a Good Digital Watch, because It's Modern (You can also get Classic, but Modern things. The Classic, Doesn't Necessarily mean being Old). Obviously I Use Practical Things and in the Greatest Possible Taste.

56) We have to Learn to assign the Right Value to Things. I've been sick, so I know Perfectly Well...What does It mean to have a Big Problem (In a Life or Death Situation). That's why today I'm not going to Worry at all about having a Small Problem, such as a car crash (Without Personal Injuries).

57) "I Never Lie,...Why should I Lie?, I have No Need To Lie; If They Believe me... Fine, and if They Don't Believe me...What the Hell do I Care!"

58) The Work of so Many Scientists who Discover new "Things" to Understand a

little Better the Universe in which We Live is Admirable. But I give much more Value, and Admiration, to the Pioneers; that since Centuries ago, and even Millennia, are making our Lives easier; because, perhaps, They didn't even have the Multiplication or Division, nor Telescopes, nor any Measuring Instrument; So...“How Did They manage to Do Everything They Did?”
As I always say...“We all have Problems in Life,...Right?,...Well,...all these People, despite all the Inconveniences They had,...have Made Something of their Lives!”

59) There are some Themes that I have not explored in greater depth, or even, there are others that I have not discussed at all; because I don't want to hurt the Susceptibility of absolutely Nobody. There are very Reasonable People in the World, but there are Others who aren't. So I don't want to Create myself any Enemy simply to seem a little Smarter. Committing to some Issues would be very Imprudent of my part.
That is why most of all People are, apparently, Very Superficial. “I do give Credit to the Intelligence of People,...Of course everybody have their Opinions Formed, and They have Things to say!” The only thing is They don't tell them because They don't find It Convenient.
-There are Times that It's Better to pretend to be Stupid-

60) Thanks to my Father and my Mother, I have a somewhat...Prominent Nose. My Nona told me that when I Grew Up, I Disgraced Myself. I Think Otherwise,... As I always say...“I have an Aerodynamic Side Face”, Justly to Cut the Wind. From my Point of View...That would be an Evolutionary Advantage, LOL.

61) As I have a little Myopia I have to wear glasses to see well from Far, especially They are required to drive a car; but to see up Close, to Read, Write, to be with the Computer, and even watch the time in a Wristwatch, I have to take them out; moreover, I don't use them to be in a Confined place like the Interior of a House. I mean...I have to wear glasses, but I have to take them out All the time so I can do almost Everything. So,...As I always say...“Everybody have to put glasses On to see Better,...I, have to take them Out”; and People, Surprised, ask me...“But, why do You put them On in the first place”,...and I answer...“Because I Look more Intellectual that way!”, LOL.

62) According to my Own Experience, the Biggest Effort We must do is,...

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

Break with Inertia. It is To Change with the Overwhelming Routine with which We come, and Launch into the Adventure (I mean a Calculated Adventure, not Random). "Do Something Different to help Us Improve our Lifestyle." Once We are located on the Dance Floor, Well, We have no choice but To Dance, Well, Bad, or Worse, but To Dance at last. That is why the Biggest Effort We must do is Get Inside that Dance Floor. It's there that We have to Redouble our Efforts to...Break with Inertia.

63) Everyone are Entitled to their Opinions, of course, We all have our Opinions formed on all aspects of Life; but that doesn't mean They are Valid Opinions. They are Valid for Oneself, but, perhaps for No One Else. I, on the other hand, say..."If I Don't have Enough Quantities of Information from those who Know,... I can't give a Valid Opinion!"

64) It's true that, with your money, You can go anywhere. Everything You buy must be checked and rechecked, even new things; and everything must be written in a Contract, Not verbally. Because once You give your money, at that very moment, is when You lose all your Rights...to the Claim.

65) CONSTITUTION OF THE ARGENTINE NATION. Article 22: "The people do not deliberate or govern, but through their representatives..."
To Deliberate is what We have to Demand from our Direct Representatives, The Legislators, for that They get paid,...They don't do It! That is what our Heroes did in the "House of Tucumán" (Historic Building in Argentinian City). "It doesn't matter so much what They Decide, It's much more Important that They Discuss It and They All Agree."

66) I predicted the death of Steve Irwin (The Crocodile Hunter). What He did was dangerous; He trusted his abilities, which He undoubtedly had them, and He did It for many years. But I said..."Too many times tempting fate, too many close encounters,...just by Chance,...someday, maybe, He won't have slept well, maybe He's tired, so his reflexes will be diminished, or simply Bad Luck, and that day is going to be his Perdition." He succeeded so many times, but only once against him was enough.

67) Don't worry about a Nuclear War,...that's completely unthinkable.
The territories thus won would serve neither winners nor losers.

You can see this very well with the Chernobyl Nuclear accident (1986).
Ukraine lost part of its territory. They continue maintaining Sovereignty, but not Possession of the territory for 10,000 years.
Besides They would also poison, even more, the Biosphere of the entire Planet.
Our Ancestors died being clean of Radiation, but We Aren't.

68) Darwin's Theory of Evolution states that: "Those Individuals that Adapt Better to their Environment are More Likely To Survive."
I like this Concept, but,...I have a sommmmewhat Different Idea.
Do You imagine an Epic Battle until the death of our Ancestors? Of all those Runt, Bearded, Dirty, Mangy, Lousy, and Deformed Improvised Soldiers (If the Opponents did not die by the sword, They died by Contamination. Illiterate, and with a Life expectancy of 35 years, It was To Doubt of their Intelligence). Who shout at each other in a Thin voice..."I'm going to kill You, for the Love of God I'm going to kill You!" That's a scene They took very Seriously, but that's completely Ridiculous for Us. What We would do would be...Take one of them by the head with just one hand, separate him from Us still taken from the head, so He moves his sword touching nothing but air, and Tell him (Clenching our teeth with Anger)..."Shut Up Midget, You are Embarrassing Me!"
Just now We can realize that, in fact, We should be Ashamed of all our History.
-What Worries me is what our Descendants will think of Us-
Then,...Correcting Darwin's words, I would say..."Evolution Occurs... When Each New Individual has Reasons to be Ashamed of Their Ancestors", LOL.

69) I've never been to a Psychologist, Why?, To Tell them my Problems?
I think if I Really start talking, I'm going to make them Cry. Then,...Why don't I go?,...Because I have Mercy on the Poor Devil. Do You realize what this means?... that "I'm a Merciful Man", LOL.

70) Heaven and Hell are Neither Up There Nor Down There. They are Located Within Each of Us. They Depend on ourselves. How to know what to do?... "Common Sense,...Just Common Sense!"

71) "The Learning Process is just that, a Process." One goes through very Different Stages, Physical and Mental, To Learn Something. Like at School,

or learn Computing, or learn a new Language, or learn To Dance, or Play a Musical Instrument. Don't worry that at the beginning, maybe, You don't understand Something, or Everything, that's very Normal; don't be Intimidated by It.
All You have to know is that Sooner or Later, You're going
To Grab the Taste of It...Don't Doubt It! It's just a matter of Trust, that's all.
-Absolutely Everything is Learnable (All the Good, but also all the Bad)-

72) Don't Try To Change them, Let them Be, Enjoy them that Way, in Every Way.
-Let Your Loved Ones Live their Own Life, Not Yours-

73) -Help Someone with the Sole Condition that This One, in turn, Help Someone Else when They Need It-

74) Once, a Coworker showed me a picture of his Grown Daughter, and I said... "Woooow!", and He, frowning, tells me..."Waaaat?", so I replied..."No,... I Congratulate You, because what I see is a Very Well Developed Human Being", LOL.

75) There are some times that One could tell someone..."Sir, Stop doing Things!, because Every Thing You do, You do Merda (Italian Bad Word)."

76) How Old am I? I've already mentioned that I Never Lie. Then I could say that..."I already Came of Age",..."By 2001 I was already Born, of course",..."I can already leave the Country without my Parents' authorization",..."Even more, I'm over 30 years old",..."Yes sure, I can already be President of the Nation."
Oscarcito for President!...What do You Think?
All these Statements are Great Truths!, I'm not LOL.

77) I'm not a Young Man, but,...of course I have Many Plans for the Future yet. "I still have Several Pending Subjects; but,...
I Reserve that for Myself !",..."Life Goes On...?!"

78) As I always say about Myself..."Old Yes,...but Not Used", There It is All the Difference!, LOL.

79) In Everyday Life, All the Time, We come across with...-Things that

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

Should Be, and yet...They're Not-

Life is surrounded by Details. I, in particular, am a Man Haunted by Details; I'm already seeing them!: "Here comes a Detail from above, another comes from the right!,...Do You see them, Do You see them?, I do am seeing them!, And They come to Crush Me!",LOL. We are surrounded by thousands of small (or large) Details that make our Lives Miserable. We must be able to work out all those little Details, so We can move on later. For this We must have an Orderly Life.
The best advice I can give to anyone is..."Order your Life", do It by all Possible means, take It as your Life depends on It, do not resign yourself to living in chaos. -Live an Orderly Life!-; to be able to solve, one by one, all those little Details, and thus Move On. Don't Let a Detail Stop You! Except for Death, All other Details are Surmountable!,..."Lower your head and Push forward, Don't look back, Always Forward!"
Another of my Favorite Movies is...Groundhog Day (1993), with Bill Murray. This Movie is already a Classic. There It is shown how, counting with all the time in the World, One learns to Live. So...What is our excuse?,...precisely that, We don't have Enough Free Time to pursue our own Interests! We are Burdened by all those little Details of Everyday Life. -First Learn to Order your Life- There are No Magic Solutions, everything is Trial and Error, Trial and Error of what is best for You as a Unique Individual.

80) They already told me that..."I'm a little Man who doesn't believe in anything or anyone, and who doesn't care about anything or anyone",..."No, It's Not like that!", what I've tried to do is Get Rid of my Feelings, Emotions, and Pride, and Think about what should Really Be Done; and They Tell me..."Nobody knows that!",...and I say..."Yes, I know!,...At my Age I have the Obligation To Know It!" I have the Obligation To Know what is Right and what is Wrong. Because if I don't know It, It would mean that..."What the Hell would I've done my whole Life?, I wouldn't have done Anything!",...Do You realize?

81) There are People who, when They're Young, Strong, and Healthy, take absolutely everything They want from Life by any means. But time, inevitably, passes for everyone; so when They are older, in that moment, They grab their heads for everything They have done in the past. Precisely, They spend It Suffering in what would be their Golden Years, in what would be their last years of Life.
As I mentioned in the Parable (70)..."Heaven and Hell are located within each One of Us." I'm talking about, more or less, Rational People; Not Crazy People who

have some Pathology. Many will say that there are many things that only a Madman can do. And I say..."Don't believe It,...Man is an Animal of habits, He gets used to everything Good, but also to everything Bad." Then tomorrow, You may receive a Reproach from your Wife or your Children, that They tell You..."What the hell were You thinking to do everything You did?",...and You answer... "Precisely, I was thinking of my Family, my Wife and Children, to do everything I did!",...and Your Wife responds..."Well, if that's the case?...You did It wrong,...You were wrong!" "That's what Happens,...It's always the same!" And, What are You going to answer?..."You did the Best You Could",... "Well, the Best You Could Wasn't Enough!...Right?" "And what You Should Do is...Commit Suicide!", LOL.

82) The Main Word that Exists is: "Trust",...Because It Allows You "To Believe" - It is Not the way Around!

83) In Parable (30) I've mentioned that my Nona (Grandmother, in Italian), had a Rotten Character. But, let's start from the base, that She was always very, but very good to Us, her Grandchildren; I have absolutely nothing to reproach her with. I remember that, when I was a Child, I was going to spend a few days at her home. She would get me up early, bring me Mate (Kind of Tea) to bed, She would seat on the edge of the bed, and We would talk for hours, until noon, when We had to make the meal; and then We talked even more.
Yes!, without a doubt She would approve in what I became.

84) I asked my Father..."If He felt He was the same as usual, all his Life?";
and He replied that..."Yes, He felt He was the same since He was a child." I, on the contrary, say that..."I have changed many, but many times throughout my Life, always for the Best, of course."

85) As far as Sex is concerned: I would Teach my Children to do whatever They want,...but to do it Well. Take care of your Body because It is the only one You have! -There are some things that I'm going to be able to Teach them,...other things Not- "You have to Prepare them to be Self-sufficient regarding Everything in Life."

86) What Separates Us from Animals? Doing the Basic Biological Functions certainly isn't. Animals make the Best use of Common Sense. So...It's Not that!

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

Animals can also appreciate Good Music, also beauty, Good Company, Teamwork, a Feeling of Belonging, Loyalty, Respect, including Love, Absence, Learning, Remembering, and also, They are Aware of Themselves and Everything around them. So It's Not that either! Then...What separate Us from Animals?
Answer: Is that They take things as They come, without Questioning anything.
In our case It's the Insatiable Curiosity as a Need for Survival, and the Permanent Search for how to satisfy this Curiosity. We ask ourselves questions about Everything in the Universe, especially about Ourselves. That's the road We Must Travel.
-The more Questions We ask ourselves, the more We Differ from Animals-
"Never Lose that Curiosity!" Parable (109)

87) Some Dreams, as a Boy, that made me think, perhaps Premonitory. Some of them Recurring. Let's see my analysis of them:
I have a Good Defense Mechanism: Back then, Monsters Movies were shown and I watched them on the black and white TV. And I had Nightmares about them.
Did You see how Frankenstein moves? (Frankie, for his friends; "Nobody calls him Frankie!"); Well, I was much faster, of course; I was going through a parking lot escaping from him; jumping over cars, and going under them. I assure You that Frankenstein never, but never reach me!
I'm an eternal Romantic: In this case, I was the Monster of the Black Lagoon. There was a couple in love on the shore of the lake; I come out of the lake, with Suspense Music ♪♪♪♪♪; They see me; I rise a hand with my sharp claws, to strike the killing blow; He moves in front of Her, to protect Her with his body; and I say... "Ahhhh,...L'amour" ("Ahhhh,...The love"; from French); and I let them go.
Alone, always alone: In a futuristic war, with laser beam; It's a total chaos, all the good guys die, all the bad guys die; and when the smoke clears, I am the sole survivor; safe and sound, but alone (I never really died in any dream or nightmare).
I have to make Myself heard: I was walking along a pier; for some reason I fell into the water; I saw People go by up there, but They didn't see me; so I decided to ask them for help, but no words came to my lips even though I tried harder and harder; until suddenly, in the middle of the night, a heartrending scream is heard, that woke me up..."Help!", with my arm extended upwards, out of the sheets.
I don't snore when I sleep: And I know It perfectly well, because on two occasions, maybe I was sleeping in a bad position, I Snored, and my own noise woke me up.
-I wonder if..."Would any Dream Analyst approve everything I've said?"-, LOL.

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

88) Al Capone already told the Press..."You should never go against the Law,... because that's Bad for Business." But He didn't say It to himself, and We already know how He ended (Sooner or Later They are going to catch You).
To the Bad Guys: "There will always be a Shark bigger than You in the tank,... Always!" (And I don't mean exclusively the Law) Who did You Really Bother?... Uhhhh,...Poooor Thing!

89) "There's nothing Worse than a Strong Character Person,... but Wrong."

90) My Recommendation for People who want To Write, but aren't Encouraged. If You want To Write, No problem. It all depends on whether..."Do You have something to say?,...Or Not!" Don't let your Ideas Fade into Nothingness. Write down those individual Ideas, and then, Shape them, put them all Together, Write them down, and Post them. That's all! I don't allow myself to lose an Idea; if I have a specific Curiosity, I have to Satisfy It Immediately, or I write It in a Draft Copy to later see It at another time, and so I don't lose those Ideas that originated that Curiosity. I Look for Information on Wikipedia, Google, YouTube videos, etc., both in Spanish and English, to give them Shape. It just takes a little Good Will (Like everything else in Life). If You don't have Time, do It at the rate You can, but Do It!
I've already mentioned in Parable (79) that One is Besieged by Details; "Don't worry about them, You yourself are going to be solving each and everyone of these Details while You Deepen into the Subject,...don't doubt It!,...It always happens the same thing!"
-And Do It like that too, To Put into Practice any Idea You may Have-

91) What happens many times, is that..."There are things that No Longer Fall within the ground of Good or Evil, They enter within the ground of the Ridiculous,...Which is Much Worse!"

92) "Enjoy your Student years, because those Pass Quickly." "Take them as an Adventure while You can still be Wrong." "Once You Graduate, You will No Longer be able to make Mistakes anymore",...-Lives will Depend on You-

93) "A Notebook of Good Contacts, acquired after a Lifetime, is Priceless."
For Example: There are many People who have declared Bankruptcy, but have

kept their Contacts Book Intact, so They have been able to Recover with Increase, apparently Arising from their Ashes.

94) Speaking of Arising from its Ashes. I've already mentioned in the Parable (49) the way Man Evolved. This Generational Clash manifests itself very well in the Movie The Fly of the Phoenix (1965) (The Original Film). With James Stewart, playing the pilot of a plane that crashed in the middle of the Desert; and Hardy Krüger playing the German Engineer, Aircraft Designer, who came up with the Idea of building a new Flying Machine from the wreckage of the crashed plane. Here You can see how a Tough Guy like James Stewart could Not conceive that the Planet be inherited by these Little Men who do everything with their Formulas and their Computers, even managing other People's Lives. "This was already been considered in 1965!"
There's a lot of confusion between People. In Developed Countries They say the only way is to Work Hard, Yes but with the Intellect, not with the back. Sure!
No One was born knowing anything, Why can't You learn too?
It doesn't matter that later, with your Degree, You can't get a job; It's true that sometimes an Engineer has to dedicate himself to being a Taxi Driver,...But It's very simple, the World Changes, for the better, with Books, and to write a Book that Changes the World, Culture and Education are required.

95) I consider "Life" to be an Opportunity given to Us, an Opportunity to do something Good. So..."How can It be that there are People who Miserably Waste this Opportunity?" I do understand them, but...I don't agree with them: People who Risk their Lives for Nothing Really Important. Of course, what may be Important to One, may Not be Important to Another, and vice versa. -That's the Main Problem among People- But...We are going towards a Collective Consciousness, Luckily. And those who don't have the same Values, are Sociopaths, of course.
I've always had far more important things to do in Life than get into Trouble.
I don't accept Problems, I dedicate all my Intellect to End them, I don't let them Overcome me.

96) Because of the above: It's very common to be asked..."What would You do in the place of a Person who is in a Problematic situation?"; and I answer..."Let's start from the basis that I would never be located in that situation,...Never!"
That's why I've never Identified at all with the TV series The Simpsons (1989-

Present), for instance. This Series was created in order to make You Laugh of your own stupid things; "No, not even a little bit." It's even been a long time since I got mad at them; I can't watch so much stupidities together; I find It very, very shocking about Everything that I am.
"I live a Super Orderly Life!" There is nothing out of my Control in my Life, even when I've been very Ill.

97) I've already said that I give Credit to the Intelligence of the People...With respect to so many Politicians and Social Leaders. As I always say..."It must be very Sad to realize that the only Ones who pay attention to their words are the Gorillas themselves, like them; No One else in the World is going to listen to them."

98) Know that I place a lot of value on the People who always have a Smile on their face (Natural, Not Forced, of course). In particular, I consider myself to be a Smiley Face Person. Like so many TV Presenters, They just have the job They have because everyone Likes them. "You're going to stop People Liking You by looking more Professional." They may Respect You, They may Fear You,...But They don't Like You. (Remember that You always change your Opinions throughout your Life; Maybe It's too late for You,...and No One will believe It if You change your mind).
Buster Keaton (1895-1966) (Stone Face) became seriously ill from having to fulfill a Contract that forced him Not to Laugh.

99) Gilgamesh the Immortal: It was an Argentine Comic based on an Ancient Sumerian Legend: First Civilization in the World; located in Southern Ancient Mesopotamia, at the Mouth of the Tigris and Euphrates Rivers, in present-day Iraq; They Invented the Wheel (according to some Authors), the Writing, the Beer, and the Potter's Wheel; They were very advanced for that Time, and They Laid the Foundation for all Disciplines; They didn't have Stones, but They did have Mud to make Bricks; Prehistory Period corresponding to the Early Bronze Age. Some Current Urban Legends attribute the Sumerians to having an Extraterrestrial Origin, especially since It's Not Known where They Came From, or for their Advanced Development (Logical,...Writing didn't exist before them). The following Civilizations Developed, in the same Geographic Space, in this Order: Sumerians » Akkadians » Babylonians. Legend that constitutes the Oldest known Epic Work of Humanity; written by the Akkadians, in Cuneiform Script,

on 12 small clay tablets, in the..."Epic or Poem of Gilgamesh"; consisting of about 3,500 Verses. Referred to Sumerian King Gilgamesh of the walled City-State of Uruk, about the year 2,750 B.C., who Reigned for...126 years?; for this reason the Oral Sumerian Legend about this King was created: "Mythological Hero (Demigod) who, at first, has Dangerous Adventures when faced with Fantastic Animals; but later, He Himself seeks the Immortality of the Gods; all this in the face of the Magnificence of the City."
In the Argentine Comic, in Series, the adventures of Gilgamesh are related After Getting the Immortality by helping a wounded Alien named Utnapishtim (Name, in Babylonian, of the Sage who helped the Original Hero). The Alien tells Gilgamesh..."If You want me to Grant You the Blessing of Death, look for me in the Stars"; Gilgamesh asks him..."How will I know where to find You?"; and the Alien responds..."It doesn't matter,...You will have millions of years to search for me!", LOL?!

100) It's very easy to get carried away by Imagination...Once It happened to me that I looked into a dark room, I turned away from there, and I began to Rave: That a Being, an Entity, a Ghost, was going to come out of the darkness behind me. "It must be a soul in Pain, a Devious Being, thirsty for blood, with thousand of years Suffering on this Earth, Disgusted by Loneliness and Boredom"; and I thought..."Yeah sure, It has to have fun killing People." And I thought that... "It must be extremely cold to the touch, of course Because It has No Soul!" And I said..."Yes, I feel You, I'm perceiving You, You can hide from everyone but Not from me, I know that You are there Son of a great..., I'm looking at You from the corner of my eyes, I can even smell your nauseating breath"; And I was already shrugging waiting for the stab on my back; When I suddenly remembered that..."I don't believe in ghosts!"; and I said..."But,...Why I don't go to hell!", and I forgot the whole thing until now, LOL.

101) I would like to go to Europe to see the Ultramodern. Not the Emblematic places of Tourism, on the contrary, I can see that on the Internet. I want them to show me the New part of the City,..."What makes them to be part of the First World?" Yes, I already know that everything is very Neat and Clean, but, but I mean..."What is It that really makes the Difference?"
Of course I would like to go to Tokio, Japan; and China too.
I already know that what really makes the Difference is Not in plain sight, It is

handled in the Background, in Second Plane;...But let's see! "Let's see if They really Control Something,...or They Don't Control Anything"; "In this sense I'm Not so Optimistic."

102) I Neither Hunt nor Fish. "I wouldn't want to see how the Sparkle in the eyes of a Living Being fades away, just for Fun." That's Not my Idea of having Fun! And those who do It have the Sensibility of an Insect,...Right? Fortunately, most of Us, value all kind of Life.
When I was a Boy I used to fish for Mojarritas (A very small fish that doesn't even have blood). Then I was very impressed to see, on the Santa Monica Pier in California; a huge fish about 2 meters long and very fat, indeed; all injured, with its blood covering the Pier, and still Alive. No,...I don't fish anymore!
That's Not valid with Pests. For Example: You cannot Graciously Invite a Cockroach to Leave the House,...Of course!

103) The Problem of many Elders: My Old Friend, who says that..."He is Older than Friend", He doesn't want to do anything, He has No Will to do anything, Nor He's Interested in anything, since He says..."That He's going to Die at any moment, because No One has Bought Life." Well, He already part of Wrong Premises. With that criterion nobody would do anything, because We die at any moment...Right? Fortunately, many People don't think that way, and They start doing things. I told him that, according to Science, there are 3 Ages that mark Aging: 34, 60, and 78 years Old. And I told him..."You didn't turn 78, so You're still an Immature",..."He didn't believe me!"
Another Old Friend surprise me by saying..."The only thing that mattered to me in Life was Drinking, Smoking, and Dating Women." He was very responsible Raising his Children, but the Children grew up and no longer need him; He also can't do what He was Interested In when He was young; So now He has nothing to Live for. He sees himself as Disable, and the only thing left to do is Die. Well, He also started from Wrong Premises, because Life is much more than..."Drinking, Smoking, and Dating Women", Life is much more than that! He also doesn't mind to take care of his teeth, nor dressing up to look Better.
And I say..."What a Limited Mentality!" "How can I Not take It Personal and get Angry?, If this People are Insulting everything I am!" No Sir, Death is going to catch me doing Things; I'm going to do It at the Rate I can, but I'm sure that...
I'm Not going to be Vegetating!
The New Generations are Increasingly Long-Lived. More and more People in the

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

World are reaching 117 years of age. But look at the Hollywood actors, many of them are over 90 years old. In this way It's Not Inconceivable to reach 110 years of age (At least) for the New Generations. "So I don't worry,...I still have Half a Century more." "I'm Exaggerating but That's the Idea", LOL.
-Youth is Brought In, Not Out, Man!- That's why there are Young People who are already Old, and there are Old People who are still Young. Precisely for this reason It is said that..."The Third Age is the New Adolescence." Because now, with Free Time, You can dedicate yourself to what You always Wanted To Do, and Never Could.

104) I had the Opportunity to Speak with some Pseudo or Quasi Criminals. They All come from Destroyed Homes. They Blame Everything on the System; of course, according to them, We have Created a World for Ourselves, in which They have No Place; that's why They are Social Resentful. It's True that Poverty and Marginalization take People's Hope, but I ask them the following: If when They turned 16 or 18 years old...Didn't They Think of anything to get out of the situation They were in?; Didn't They decide to take Control of their Lives into their own hands? Of course, this People don't believe They are Responsible for anything, on the contrary, They feel They are the Victims. Fine, but that's something Different; "That's showing a Complete Lack of Character; A Total Lack of Initiative; Do You realize that this Cannot Be?,...They can always Do Better!" A Young, Strong, and Healthy Person, shouldn't be afraid of Anything or Anyone in the World, to make things Right. Don't Let Events get Over You. Surely some Idea has to Come to You. Don't Let Anything or Anyone Deviate You from your Original Plan. Also, keep in mind that everything Begins with Education. The Public School System is very Robust in our Country. It Just takes Time, and Dedication, Of course!, like everything Else. The question is...Are You willing to Invest that effort in your Life?, Or Not!; Aren't You willing?, Well, then Continue as You have been up to now, that surely You will do very Well in Life...After You get out of Jail, or Worse.
They say the Police are pigs because They don't Treat them Well. I, on the other hand, have another opinion of the Police: "The Police are there to Protect me from People like them."

105) I don't think I'm the Only One to whom the first Word that comes to his Mind, is the Word..."No",...I don't think I'm the only One!...Right?

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

106) What Chance did I have? When I Studied there was No Bachelor of Business Administration here in Rosario, I had to go to Buenos Aires or Córdoba.
My Parents couldn't support me, so I went Completely Alone to Buenos Aires.
And throughout the time of the Presidency of Raúl Alfonsín (1983-1989), con la Hyperinflation that existed that left 40% of Poverty in the Country, for which He Resigned before fulfilling his Mandate. I managed to get a Job, support myself, and pay for a Private University like U.A.D.E. (Argentine University of Enterprises). "It's OK that...I slept 4 hours a day, and I did It for 6 years." And now, 30 years after I Graduated,..."I keep having nightmares that I can't finish College (How distressing is to dream that You are walking the streets looking for Work, with a Jacket, Tie, and briefcase, but with the briefcase...Empty); Except the last nightmare I had, in which I was already a Professional, but Advantageous and Cheap." "No Sir, I did Not Quit!"

107) What thing could I Study? Unlike many People, I Did Choose what I Wanted to be in Life. When I was a Child I was Fascinated by reading some small books, which came weekly, and whose Title was very suggestive..."The Great Fortunes"; No,...They were actually the People who developed U.S.A., when the Industrial Revolution came to them in the 1800's; And each Booklet brought a different Personality: John Davison Rockefeller (The King of Oil, the Patriarch of the Rockefeller Dynasty), Cornelius Vanderbilt (The King of Steel, who Built the entire Railway system), John Pierpont Morgan (The King of Banking, from the J. P. Morgan Bank),...And so many Others. We are Taught that the Fathers of the Scientific Management of Organizations are Taylor and Fayol (This is for the Decision-Making Process, Correct, of course). But those Personalities that I mentioned before, They were the Ones who Rewrote the Laws (Never ever go Against the Laws, but Use them for your own Convenience). The same Spirit exists today with so many Tech Companies, whose Marketing Methods are Very, Very Aggressive (They are located on the Edge of what the Law Allows them). "All that is Not Taught in Business Administration at the University."
To top It all, in the '70s or '80s, TV Series such as Dynasty, Dallas, Executive Suite, etc. appeared; that They were Authentic Teachings in Business Administration.
But, I was Wondering...How can It be that this People have all kind of Problems, except Economic? And I said..."A Successful Businessman, accustomed to make decisions that affect the Lives of many People, Cannot have a Disastrous Personal Life, On the Contrary!",...Do You realize?
So, for all of the aforementioned,...What else could I Study?

108) How is Having Culture and Education interpreted?...It's Having Read a lot about very Different Subjects!
I can Opine on Companies, which is my Speciality, but I cannot Opine on any other topic. I'm Obligated to Believe in those who Know, in the Experts who write on very different topics, since They are the only Ones authorized to Opine on them,... Right? I just limit myself to repeat like a parrot what the experts say about Geography, History, Politics, Physics, Chemistry, Black Holes, the Universe, etc.
-Having Education is precisely Having Information-
But,..."Where is the specific Difference between Having Culture or Not?"
The Difference is that You have to Read several Authors and see what They think about the same topic, and in those circumstances You draw your Own Conclusions according to your Own Values, and You can give your Own Opinion about It;
Thus You become a Critic, as an Art Critic, Film Critic, etc. (Who can Criticize in a Positive or Negative Way).
-Having Culture is precisely being able to Express an Opinion and Criticize-
It's Logical that You are forced to Read a lot, if You want to get to know Everything.

109) Cultivate the Art of Reading!...Instill It in your Children, so that They get use to It from a Young Age! That They go out with Friends, that They Practice Sports, that They Socialize, but that They also take Time to Read Everything.
When You Read, New Synaptic Junctions are formed in the Brain (Connections); That's why You are Remaking yourself, You are Constantly Reinventing yourself.
When I was Young, Books were made of paper, now They are All Digital (Which is much Easier); the Platforms have Changed, but the Curiosity remains the same;
-Never Lose that Curiosity!, because if You do, that day is when You'll Start to Die- Parable (86)

110) According to Psychology..."The Happiness that Money brings only lasts 4 months." After that time, One falls into the Reality that You'll Never Really Know what are the true intentions with which All those Close Ones approach You.
"That kind of permanent stress Shortens Life", LOL?!

111) I was watching a Gangster Movie, and part of the Dialog Says..."Take that Money and Buy yourself a Nice Life." How's that?; "I, without much Money, always believed to have a very Satisfactory Life." "What happens is, that They

prefer to do any Bestiality in order to Not Work, Not Study, Do Nothing in all their Miserable Lives." Of course, all of that is for the Imbeciles, and They Live for Free at the expense of Others' Efforts (They don't love anyone, Not even themselves). Once I read: It's Not like the Movie The Godfather (1972); There is No Respect among Gangsters, They make themselves Respected out of Fear, which is very Different; and They have the Loyalty of their People as long as They serve their Mutual Interest. They are very Nationalistic,...Of course, How could They Not Love the Country that allows them to do whatever They want? In the Movie Die Hard 3: With a Vengeance (1995), the Bad Guy (Jeremy Irons) says..."Oh God, I Love this Country."

112) As I said in the Parable (81)..."Man is an Animal of habits, He gets used to everything Good, but also to everything Bad." So, since We're going to get Used to Something after all..."We'd better get used to having Healthy Habits, Not Bad Habits",...That's the Idea!

113) I like Actors who can play as very good Villains in Movies. Because the Badder the Villains are, the Better They make the Hero of the Film Look.

114) I found a way to Learn another Language, speak It relatively Well, and Fast: "Learn, as Quickly as possible, as many Set Phrases as possible in that Language", so We don't Need to Continually Translate in our Brain. Sure,..."We speak very Well, and almost without Thinking, in our Native Language, because We have Learned Many More Set Phrases than in any other Language."
In California: When a Friend wanted to say a few Words in Spanish, I said... "When I hear You trying to speak in Spanish, I feel such Pain in my Soul, which is probably the same Pain that You feel when You hear me trying to speak in English", LOL. "No,...He was much more Understanding with me, than I was with him!"; I asked him..."How was my English?"; He told me that..."In all the time He knew me, my English had Improved a Lot, especially in the Number of Vocabulary Words, but, I Still had a Foreign Accent." That's why I decided to be a little more Humble, and I Always Clarify..."For My Much Less than Perfect English, I...am Very Sorry that My Best Effort is Never Enough." Because I'll always be left wondering if I said Exactly what I wanted to say, since I don't agree with the Concept of..."Lost in Translation", since They are two Superior Languages, very Complete, and that there should Not be any more or

less words to express my Ideas. I try to write, in both Languages, with Zero Tolerance for Translation.
Precisely,...I call my two Publications Spanish Version, and English Version. Because I Wrote them, sometimes Thinking in Spanish Set Phrases, and other times, Thinking in English Set Phrases. Then,..."Which of them is the Translation of the Other?",..."There's No Translation, They are Versions!",..."Because the Original only Exists in my Mind, and It's Made Up of those two Languages."
By the Way: "English is the Only Foreign Language I Know...Because I didn't Believe in the Need to Learn many more Languages since English is the International Language. So I just Believed in the Need to Perfect this One Language",..."United States of America Basic English."

115) I was telling a Neighbor on the latest Discoveries about the Universe. He told me that..."He is Afraid of those Numbers, because He does Not Understand such enormous Times and Distances"; And I replied..."If You don't Understand It, You are Not Alone, because No One in the World Understands what the Extremely Large means, Nor the Extremely Small,...No One!", because We have Nothing to Compare them to in Real Life; But..."Don't be Afraid of Numbers, They are just Numbers, They have Exactly the same Properties as any other Number; They can be Added, Subtracted, Multiplied, and Divided like any other Number." In that sense..."Saying 2 Billion Light Years Away is Exactly the same as Saying 2 meters, There's No Difference!"; Because You have to do Exactly the same Mathematical Operations,...That's It!

116) They Asked me..."If I Like Math?" "I don't Like Mathematics if that makes me a Mad Scientist Outcast from Society; But, I do Like It as a Tool to be Used when I Need It."
I would Change the Concept of the Question: Instead of using the Concept of Like or Dislike, I would use the Concept of Understand or Not Understand. That's why I don't like Mathematics that much, but I do Understand It. To me, as Liking, I Like the most Popular Science in the World, which is Astronomy (Space... The Final Frontier, according to the Series Star Trek). About All other Disciplines, I have an Insatiable Curiosity; That's precisely another Concept To be Curious or Not to be Curious.
"The Secret is To Accommodate the Mathematics according to our Own Convenience." That's what has been done since the beginning of History,...As long as You fallow the Rigorous Mathematical Steps that allow You to

do each Operation, You can Accommodate It however You want (The same thing happens To Write a Work, in any Language,...As long as You follow the Rigorous Grammatical Steps that allow You to do each Language, You can Accommodate It however You want. It's always the same Process of Creativity, in All Disciplines,... Dare To Accommodate them!, and thus Establish in the World your Own Style of doing Things).
"Mathematics is One more Tool that We have at our Disposal, Free of Charge!,... Why Waste It?,...Given that, We all, Need It all the time (Every time You Look at your car's Speedometer, You're already performing various Mathematical Operations Automatically; And, better yet, You're Understanding what those Operations Mean)." Because all of that...I don't agree with People who say... "I don't like Math!" If You have a talent for Social Studies,..."Put a little more effort into Learning Math too, and Vice Versa!; To be Complete Persons, Integral Human Beings." Remember that James Bond 007 is an Expert in Everything, including Cooking; As seen in the Movie A View to a Kill (1985) with Roger Moore, and the Bond Girl was Tanya Roberts.

117) I have a very Popular taste in Music. In general, I follow the World's Greatest International Hits. I do Not Stay with any Singer or Musical Group in particular. "I can always Rescue Something Interesting from Each of them."

118) Rebecca (1940): The Film Begins when enter stage Laurence Olivier, who is the Widower of a Woman Named Rebecca, and who brings Home his New Wife Joan Fontaine. Everything is Fine at first; But then all the Friends of the Family, and especially the Housekeeper, are Constantly Comparing Joan Fontaine with the the Late Rebecca: "That Rebecca was Taller, was Prettier, had more Class, had more Friends, had more Money,...than this poor Girl." She got a Huge Inferiority Complex and a very Deep Identity Crisis, because She couldn't even come close to the Memory of what Rebecca was...She was going Crazy!
All the Spectators in the World Identified with the Misfortune of Joan Fontaine. I, on the other hand, Identified with Her Husband; That as soon as He Realized what was Happening, He Snapped his fingers and in 15 seconds He Solved the whole Problem; And Immediately the Movie Ends with a Happy Ending.
Do You Realize what is the Message I really want to Convey?: "It seems there are no Limits to Human Stupidity." "And Human Passions?...Shakespeare's Tragedies and Everything We Believed that Makes Us Human?" » "To Hell with

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

Passions!...We Individuals are Becoming more Practical, Thinking, and Less Stupid...Fortunately!"

119) What type of Manager would You Trust? Management is the Science and also the Art, among others, of managing People, of knowing how to Delegate Functions to their Subordinates.
So...You would Trust more a Manager who is apparently a hard worker, but, his desk is full of papers, with him Working wildly, He never has Time, Sporting a Sloppy Personal Image; And You realize that the Guy Doesn't Control Anything. Or, on the Contrary, a Manager who has his legs stretched out on his desk, reading the "New York Times" on his Computer, who always Looks Impeccable, who dedicates himself almost exclusively to Socializing; And You realize that He has Everything Under Control.

"Every Professional of every Discipline that exist is Obliged to Purge their Profession of their own Colleagues who Discredit them!"

Keep in mind that a Degree granted by an Official Educational Establishment, is a Permission to Do Things (Of course,...One has to earn that Permission); but always Regulated by their Professional Council and by Current Laws. That would be like the Civilian version of the Movie An Officer and a Gentleman (1982), with Richard Gere.

120) As the Tango says..."Poor my Dear Mother..." No, that didn't apply to my Mother. She was Not a Stupid Sufferer. She had her Character. She had Her Ovaries On Very Well.

121) "Don't Doubt for even a second, though, that Dreams Can Come True."

"I'm a Believer!,...at least in Myself." "Man of little Faith!,...Why do You Doubt?" How?...I give You the Secret:

"It all Depends on the Effort You put into them."

122) I'm still very Strict when judging People. For me Life is very, very Simple. There are the Good Guys, and there are the Renegades. I don't Complicate my Life at all with Excuses. Like I said before, I give Credit to People's Intelligence; That's why I don't think People can make such Stupid Mistakes, They just do It on Purpose. As I always say..."They are taking their Chances in Life." I, like No other, defend the fact that We should all seek our Opportunities in Life. "Yes, but

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

They are taking their Chances with the Lives and Properties of Others", LOL?!

123) Why do the Policemen of all the Countries of the World say that It's Better to be a Coward Alive, and Not a Dead Hero? Because..."It's True that We All are the Heroes of our Own Movies,...But Not All of Us have the Skills, Nor the Stamina, Nor the Luck...of the Boy Hero of the Movie."

124) I don't agree with what the American Comedian George Carlin (RIP) said... "The mere fact of having a Birth Certificate, is already Sufficient Proof of our Guilt." No Sir!,...I'm Not Responsible for Anything! I'm Not Guilty Deforesting and setting Fire to Gain Agricultural Lands, or Spraying Agrochemicals; I don't Kill Wild Animals either; or Seeding the Oceans with Plastic; I don't even have a Car to Pollute the Atmosphere; or Strip the Planet of its Natural Resources.
If It had been up to Me, I would have done all of that in a Planet-Friendly Way!
"The only thing I've done in my whole Life is Work and Study, Study and Work, and Follow the Rules." I'm Not Guilty either that those Rules are Twisted.
As I always say..."The Right I've always seen It Crooked", LOL.

125) "Here, at least in Argentina, People Don't Vote for Who We are Convinced that Really Represents Us; but We Vote by Discard, that is...Who We Think is Less Bad."
Everyone gives Ambiguous Information (A University Professional Can't Do that), Nobody Really say what They're going to Do,..."Does that sounds familiar?"
As I always say..."The moment You Cast your Vote at the Polls, at that very moment, You Lose All your Rights,...You Gift them!"

126) Working Out. I've been going to the Gym for a few months to do weights, but I didn't like It, because It makes my body very hard. One, with hardened arms, then You can't scratch your back, LOL; that simple. No, I Prefer to have an Agile body, and Not a hardened one. That's why I was watching some YouTube videos, and I've adopted certain type of Abs in my routine. Right now I'm doing 500 abs a day, I do them throughout the day, and every day without exception.
Like everything in life, It's difficult to start Exercising. The first day I only did 30 abs, and the second day I was in a world of pain; Of course, muscles that never

worked, suddenly start to work out for the first time, and hurt. However, I went ahead and then gradually I increased the amount. I was never fat, but I can assure You that a fledgling belly I had, I completely lost It 4 weeks after starting this exercise. Today, I'm Not going to say that I have all 6 abdominal muscles, No,... at least I have a completely flat stomach; And I stay as agile as when I was a child. Sure,...What about Older People who walk slowly? Unless They really have a motor disease, the thing is , They didn't do any exercise for 30 years, and all their muscles atrophied; That's what always happens! This is what any Doctor will say. And look at the vitality of Ringo Starr (Ex Beatle) who turned 80 on July 7, 2020. Of course He's dyed!, but, the Presenter of the program who gave this information said..."My 80-year-old grandfather doesn't move like this Man!"

127) My Favorite part of so many TV Shows is when a Show Ends. That gives me Hope, because deep down I'm a Believer, I want to Believe that the next Program that is going to come is much better than the current one. But They always Disappoint me,..."These Persons are Playing with the Hopes of the People!", LOL.
As I always say..."TV Producers treat all of Us as if We were Brainless"; Already, the Viewers, are not the same as the 50s when Television was born. In the End, since ever, the best Programs of all are...the News and Documentaries (That both handle Information), without a Doubt.

128) As I said in Parable (55)...On the subject of having Very Good Taste,... The Digital Watch: Make the Glass to be Flat and made of Crystal, because if the Glass is Rounded Plastic, every time You Move your Wrist, You Rub It everywhere and It will Scratch; also that the Mesh be made of Steel, Not Plastic, because It Breaks; With a Complete Calendar; Display with Large Numbers and Letters; 2 Alarms; Chronometer; Light; and Water Resistant. "Sure,...Under these Conditions...Of Course It's a Classic!" In this way,..."It's Very Easy to have Good Taste!,...Right?", LOL.

129) My Old Friend, who says that..."He is Older than Friend." We have Nothing in Common, just a Total Incompatibility of Characters; He likes Crafts, on the contrary I'm very Mental. But, It's true what They say that Opposites Attract, We form a Good Complement. Besides, It's also true what the saying says..."The Devil is Wiser for Old than for Devil", so every now and then He says something Interesting.

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

130) I learned that a Great Mathematician, of International Prestige, Married a Pornographic Actress. Well,...That's very Understandable!..."The Man has Sophisticated Tastes,...and so does She." "They are for Each Other!"

131) A Friend of Mine, Married, says that She Separates what is Love from what is Sex,...She Separates the Feelings from the Animal part. I disagree,... "If You Love, You must Give yourself Completely and Without Conditions, It must be a Mutual Surrender!" "If Not, then It's Not Love,...and your Partner is Not the One for You."
I told my Girlfriend...I don't Need a Partner, I alone, have always been Very Happy all my Life; What I Need is an Accomplice; In the Best Meaning of the Word!, an Accomplice in Life, an Accomplice with the Family, an Accomplice with the Children, and of course also an Accomplice in Sex." Therefore, as I always say to Her..."Not only I Love her for who She is, but also, I Like Her Very Much as a Woman (No,...It's Not the way Around)." I would like to Think when I say..."Let's See what Good We can do Together", that means something Extraordinary is coming. When I'm with my Girlfriend, what We do is Nothing Animal, on the Contrary, It's Sublime, a Communion of Bodies and Souls; More than Sex, I Value Intimacy, Quality Time Together. But,..."It Took me my whole Life to find Her." Keep in mind that Children can be Very Different from their Parents, of course; But, a Couple with each other, Cannot be very different, quite the opposite, They have to be Very Equal! This is for Better or for Worse. What I was looking for is a Special Being, Special for me, of course.
I've always believed that I have a lot to give to a relationship. My intentions are to get Married and have Children, To Start a Family! "That We'll be a Modern Family." And the People, Surprised, ask me..."How to do It at this point in my Life?, being that People my age already take Life for Done." But...Why Don't They go to Hell? I don't think the same way!; I'm Not going to say that...My Life is just beginning now, but rather..."My Life Continues Now." Also, as I always say..."The time has come for me to do It, It's about time to do It, I'm already old enough to do It,...Right?, LOL; Well...Why Not?

132) When Our Children Claim that We have Lied to them about Santa Claus, Father Christmas, or Saint Nicholas; Tell them that We have Not Lied, that Santa Does Exists, Of course He's Real!, that He is a "Divine Being"; Santa is a very Real Feeling in Our Hearts that It's marking all the Purity of the Smile of a Child (Of all Ages), and that We Parents are simply Santa's Helpers... "That's the Truth!".

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

133) "Get a Plan B, even a Plan C, for Everything Outside of your Control; Especially Work."

134) Who would You Die for?, for your Family, for your Country. I don't see It in that way; I don't think I'm going to Die for anything or anyone because I Know myself : I'm already going to find the way to get out of that. I always come up with something, something is going to come to me to Stupidize the Attackers and treat them like the Bitches They are. Of course I can die, just one time is enough, but I doubt It. This must be taken very seriously, that's why I say..."I'm sure I can Call on the power of all my Neurons when I really need them." "Some Idea is going to Come to me!,...It always does!,...Why hesitate now?"

135) The 5 Most Important Elements in Administrative Management, according to Henry Fayol (One of the Fathers of the Scientific Management of Organizations) and that are still valid, are: To Plan, To Organize, To Lead, To Coordinate, and To Control.
Just Mankind's Biggest Mistakes, Mankind's Biggest Confusions, Mankind's Biggest Scandals, and in general Mankind's Biggest Crimes, have been Committed, and are still being Committed for Not following those Fayol's Basic Principles, Not because People are Bad, but simply because of Human Stupidity.

"Do You Control Something in your Life, or Do You Control Nothing?"

136) Who do You identify with?, with the Old European Countries, which precisely Capitalize on their Old Age and give permanent signs of Maturity, Sanity, and Responsibility; against Countries like the United States, China, and Russia, who want to give an image of Youth, Virility, and Irresponsibility. Argentina traditionally identified itself with European Maturity, but at some point We have lost our way. It was always said that Argentina is a very young Country which needs 200 more years to mature, but that is Not entirely the truth, because the Country is made up of People, It is the People who make up the Countries, then all It takes is One Person to come who is mature enough and in power, to give the picture of Maturity, Sanity, and Responsibility from Argentina to the World.
You may identify with Latin America and the Third World, but bear in mind that the incidence of Mestizo Population (Union of Whites with Indigenous People) in Argentina is much lower than with respect to other Countries in the World that do can consider themselves to be Latino. We have a very Italian Culture, because

remember that more than half of all Immigration to Argentina was Italian, and as of today more than 40% of the entire Population are (I include myself) Italian descendants.

137) People feel very discouraged from going to School because They always believed that One would Learn Formulas, There's nothing more wrong than that! You don't Study to Learn Formulas, but Concepts. Formulas can be copied from any book. You go to School to Learn Concepts, the Why? of things. I've even had open-book final exams, just so We don't make a mistake in some stupid Formula; but what Teachers really want to know is whether We have understood the Subject. I'm very good at that, at knowing Concepts, Not Formulas.

138) Because They've heard me, They've asked me..."Do You usually speak to yourself ?" What happens is that People who cannot Read, Read everything in a row; On the other hand, People who do know how to Read always mark all question marks, exclamation, periods, commas, ellipsis, etc.; Which are what They are for. I've seen that is very useful for me to Write my Parables and then Read them aloud to see if I've precisely given them the meaning I wanted to give them, or if I've made a mistake in some sign. That method, at least, works for me.
That is what You have surely heard from me and that gives them the impression that I speak alone. Everything related to the Writing of my Works, Not for other reasons, LOL.

139) They asked me..."How has a Person my Age Not yet Married and started a Family?"
Well, what happens is that I have a Story to Tell, or..."What do You think?...
That I don't have a Story..., Of course I do!", LOL.

140) There is Nothing that a Good Blow to the Nose Cannot Solve. For any Animal, a Lion, a Shark, etc. It has already Happened! This would be the Last Option, Of course! Not a punch in the Eyes, or in the Mouth, or in the Nose from the Side; but a Good Blow from the Front, with all your strength from the Front to the Tip of the Nose, that breaks and sinks the Cartilage. That is very painful, and It disables anyone without killing them, except that They will be left in tears.

Rosario, Argentina: 08/13/2021
Author: Oscar Garcia
E-mail: eoscargarcia@hotmail.com

141) Contemplating the sizes of Planets, Stars, Galaxies, and the entire Universe, One always grieves at how small and insignificant We are. But..."I don't think the same way". I say that..."It's one thing to say that something is tremendously Big, but It's quite another thing to say that something has a Lot of the Same". The Sun seems to be Big, simply because It has a Lot of Hydrogen and Helium atoms, only... There's no variety, You see? They are very simple things that in No way, even come close, to the Complexity that Living Beings have. So, I ask..."What is more important...The infinitely Large, o the infinitely Complex?, and that We even have the Power to Change Matter according to Our Will". Let's Not go as far as Nuclear Fission or Fusion, or a Complex Industrial Process; "You, simply by Cooking Food, already have the Power to Change Matter according to your Will!"

142) What is the use of learning about the Greek Philosophers from before Christ? Sure, You say...What the heck can I care! But if You are in a Decisive Position in a Critical Situation, even if It's as a Family Father, "That helps You Decide Who Lives and Who Dies without making a Mistake", that's what They are for.

143) From what I've seen, Historically most Human Conflict occurs between People who have nothing to Live for (They have nothing to lose) and others who do have things to Live for. "So please, someone Create the Need to Live in All People. Not the Need to know Why to Die for!"

144) A little Dialog with a Priest:

Me — I want to ask You a question Father, because I've heard a paragraph from a Sermon in a Church in a Hollywood Movie, that I liked and It says... "God helps those who help themselves". The Sermon consists of this Prayer which is an Statement. My specific question is whether...This Statement is a Truth or is a Lie?

Priest — It just doesn't work that way, Son.

Me — How's that?, Father...

Priest — In general, God helps the helpless, who cannot help themselves. People who can help themselves, in general, don't believe in the existence of God, and only remember Him when They really need Him. Who can help themselves, in general, don't ask for His help. Therefore that Statement is not a Truth nor a Lie, actually, It's a Contradiction.
And..., What about You?, my Son...

Me — Well, Father, like You said,...I, for now,...am Not helpless...Thank You very much...for everything.
Priest — You're very welcome, Son.

145) When I was Young I had a lot to Learn, now that I am Older I have a lot to Teach.
There are also People who have never Learned anything, and They keep making Mistakes all their Lives. "What worries me is to know...How to Defend ourselves against their Stupidity?"

146) Don't be afraid of Words, because with them You can sow Love, Hate, Certainties, and Doubts in People.

147) After all, I do would go Skydiving. But I would do It in the middle of the Swiss Alps, in a Town called "Lauterbrunnen", surrounded by mountains, valleys, and waterfalls. Not here on the outskirts of Rosario, where there are sown fields and there aren't even trees.
I would also go Scuba Diving, but in the Caribbean, in the middle of the Coral Reefs. Not here in the dirt of the Paraná River.
Do You understand what I mean? So, Don't be confused with me!

148) If People treat You badly, that means that everyone has the idea that You are Garbage,...Everybody knows! Start behaving like a "Highly Evolved Human Being", and You'll see things change for You.
Watch out! I said, behave like a Highly Evolved Human Being, that doesn't mean that You behave like an Idiot. You do understand the difference! Right?

149) "Change is the only Constant" (Heraclitus of Ephesus).

"I wrote this Parable for People like Me, who knew this Quote, but didn't know who Said It, nor their Historical implications."
Heraclitus was a Philosopher and Writer from Ancient Greece; before Socrates, Plato, and Aristotle. Ephesus was an ancient City that was under the Control, among various Civilizations, that of Ancient Greece; It's Archaeological and Touristic Ruins are located in present-day Turkey by the Mediterranean Sea. Spread by the Ancient Romans, the Culture of Classical Greece, especially Philosophy, is considered to be the Cradle of Western Civilization. One of the earliest Thinkers of such a Culture was Heraclitus (Autodidact), in Ephesus and

other Cities of the Empire where He lived as a hermit. "He was a Rich Boy; But, due to the Nature of his Philosophy, because He was a Misanthrope (Hater of Mankind), He was called the Obscure or Weeping Philosopher; in Contrast to Democritus of Abdera (Nothing exists except atoms and empty space; everything else is opinion), the so-called Laughing Philosopher", LOL?!

150) Because It isn't always possible to make a Literal Translation of the words, this Parable makes sense in the Spanish Version (Mis Famosísimas Parábolas).

151) I asked My Old Friend, who says that..."He is Older than Friend"..."If It was true that Life before, was Really in Black and White", LOL; He replied that... "No, but,...It did was Very Faded", LOL.
Before I was born...Women with those Hairstyles and Skirts, Men with Pants up to the Navel, Square Cars,..."My God!,...What was that?" He Agrees with me that everything there was, was Rubbish Compared to what there is Today; But He says..."There was No Escape,...It was the only thing there was, It was very expensive to access the latest Fashion Trends, and if You could get any of them, You could consider yourself Lucky." Although He misses the Respect and Safety that there was Before.
In my time,...the most advanced was Space Travel, but I saw that the interior of the Ships were full of Switches and Buttons, with clock-type Instruments, and with Exposed Screws and Welds..."My God!,...What was that?"; Compared to what there is Today,...The SpaceX Ships, with Touch-Input Flat Screens, with Interior Panels covering every last Screw, which is Aesthetically Beautiful,...Did You see those Spacesuits?, and all at a Cost of 10 % of what It was Before. Only Now, the Cars have No Vibration or Noises; but before Traveling by Car, Bus, Truck, or Train,...It was Hellish, and They Smelled Bad,...They had a Bad Smell!...Do You Understand?
But Things Still Need a little more Fluidity and Naturalness. It's Okay that We've Created an Artificial World for Ourselves; Yes, but,..."The Trend is for Things to Flow even more Naturally in the Future!" Keep in mind that You Not only Grow Physically, but also Mentally, which is much more Important. "All the Variables of Life move Up and Down over Time, such as the Price of Shares on the Stock Market (Including Respect and Safety), but, The Trend is Always Bullish." Therefore..."I'm Optimistic!"
I'm Very Curious to Know..."What will happen when Man reaches Mars?, What will happen with Global Worming?, What will happen when Oil runs Out?, For the

use of Cell Phones and Social Networks…Is It true that Half of the World's Population will be Myopic?, What else is Discovered about the Universe in which We are Immersed?, Is there going to be a World Government? Since Until Now Governments have been Forced to be Completely Mean, What will happen when We have a Collective Conscience?, Etc." I, Probably, don't see Some of these Events taking place, but, the closer We get to them, the more Accurate the Details of…What's going to Happen? For now, with the Measures that have been taken,… "The Ozone Hole…It's already Closing Right Now!, and the Ozone Layer…Will make a Full Recovery in about…15 years!"

I'm Not Worried about the World I'm going to Pass On to my Children and Grandchildren, but I Think…"Let them Adapt to the Changes as I had to Adapt myself; "Change is the only Constant" (Heraclitus of Ephesus).

It can be said that I, definitely, am a 21st Century Person. Precisely,…as I always say…"My Best years have Not yet Arrived", because One has the Moral duty to grow permanently as a Person.

Therefore, Let me Share with You My Life Philosophy:

"Your Best years should be… the Ones to Come"

The End

Epilogue:

I'm going to make an Analogy from my Next Work with regard to Life…I've already Written the Beginning and the End. Now…"¡I don't have the Faintest idea what to Write in the Middle!", LOL?!…¡That's a Lie! - Parables (41) and (103) Oscar Garcia: "A Man who Bets on Life."

I cross the street deep in thought, I was distracted for a second, just a second, a truck is coming that I didn't see, and I stay there, made of a grease stain on the Pavement. Is It possible for that to happen?, Yes!, anything is possible!, "But I'm

betting that is not going to happen" (I, due to my academic training, know more that anyone the Rules of Probability, and Risk Analysis). With what sense would someone do something if We're going to die at any moment? Nobody would Learn, nobody would Teach, nobody would Read, nobody would Write, and We would continue to be mired In the cave times. But It's Not like that! All fortuitous accidents are possible, but Not probable. Most of all accidents that happen to Us are in circumstances where We do have the Control, but We have done something wrong. "That's why It's very important to do everything Right in Life, all the time!, in this way the Possibilities of Dying are reduced, and the Probabilities of Living are increased." "We are animals of Habit, so everything is a matter of Habit, That's It!, so get Healthy Habits and Fulfill them, as your Life depends on them."

How there are People my age who already take for Made their Lives? That was valid 100 years ago, but Not now. Since I already have my next 50 years scheduled, I already have my time occupied for my next half Century of Life. Of course I have things to do, Hobbies that give me a great deal of Pleasure (I have to finish a Movie Script, or change It at all because the one I wrote is too bloody, like the Movie saga The Godfather (1972) that shows several Novel ways to kill People, Yes, what a fun! I have to finish a Paper on the Universe. I have to improve my Piano Lessons.
I have to get Married and start a Family. I have to finish my work on Set Phrases in English. I have to keep Editing Movies. I have to continue adding Parables to this Work. If I want to Design the fastest Plane of all, I have to Read very carefully the Metallurgic Process of Sintering to make Tungsten Carbide with Molybdenum as a bonding agent, not Cobalt, Cobalt is a sissy with respect Temperature; And how It can be applied to a Convergent-Divergent Variable Geometry Nozzles Refrigerated by Air, Grooved in a Copper Matrix, for the Engines; The Superalloy called Inconel doesn't convince me either for a continuous Engine run, because remember that the Skin of the X-15 Rocket Plane was made of Inconel and It almost melted just by the friction with the Atmosphere at Mach 6.7, Etc.)
Hey Man, I think I have my time pretty much Booked Up! "I'm sorry for anyone who has nothing to do, who has nothing to Live for", but..."I do have things to do!" And if You don't think this way, if your Life is already over, I'm going to tell You that my Life is just beginning now; so..."Speak for yourself Mister, Don't speak for me!"

Note: I've been asked..."Why did I stay explaining the Nozzles of the Engines of an Hypersonic Plane?" "Because I just wanted to Exemplify that if You have a

Passion for something, Professionalize yourself in It, Don't be a Damn Mediocre Improvised all your Miserable Life as so many Rulers are, for example."

- **My Favorite Parable is the Parable (22)...Because of the Explicit Contradiction It Means.**

- **Another Interesting Parable is the Parable (99)...Because It is a True History Lesson. It was the Parable in witch I put more Information Search Work.**

- **Parable (131)...Because of Its Depth.**

- **As I said at the beginning They are Disordered...Because I only accommodated the first 2 and the last 3 Parables, all the others I wrote them in the order of occurrence in which I remembered them.**

- **My Next Project...I would Love to Write for People who Like to Read something Interesting, LOL. Maybe a Story or a Novel, or a Movie Script, Original, of Course!; "Some Idea is going to Come to me!,...It always does!"**
